Wildlife Federation

MISSISSIPPI HABITAT STEWARDS PROGRAM

Mississippi Wildlife Federation has joined with South Mississippi's public land managers to create a team of well-trained and dedicated volunteers to protect nature along the Coast.

The Mississippi Habitat Stewards Program is a one-of-a-kind restoration/conservation volunteer team working diligently to manage and sustain the health of our public lands. Our natural areas need ongoing long-term care, but funding is limited. In the three coast counties alone there are more than 100,000 acres of public lands to monitor and manage with limited staff and financial resources. Habitat Stewards work with our conservation partners to make a significant difference for wildlife and wild places while connecting people with nature.
