

We'll bring the field trip to YOU!

There's a Marine Biologist in my Classroom

Our team of marine educators will pack up their artifacts, equipment and specimens and deliver a hands-on learning experience that complements your curriculum and engages students. We will bring the rich diversity of the Gulf Coast marine environment to your classroom.

Every student becomes a marine biologist in our classroom workshops. This year, let us bring the world of sharks to your students. Select one or all four sessions.

Sharks

Sessions *(sessions are 45 minutes each)*

- Sharks and Their Role as Apex Predators
- Shark Anatomy and Dissection
- Conservation Measures for Shark Populations on a Global Scale
- Shark Tagging and Recapture Data - What do we Learn?

Minimum: 20 students in a session
