## GCRL Science Café Wednesday, October 30<sup>th</sup> • 6 – 7:30 p.m.

GCRL Dining Hall / 703 East Beach Drive / Ocean Springs, MS

Coffee provided by Coffee Fusion • Cookies provided by Gunter Library

### They number in the quintillions.

For every one of us there are two hundred million of them. **They're everywhere.** In the air, under the ground, in the water and on and in us. They've killed more of us than all of the other factors combined. They've been on this planet longer than us. They were here long before the dinosaurs and lived to feed on their rotting remains after the cataclysm occurred. They've survived everything that we and Mother Nature have thrown at them and they will be here long after our species has disappeared. They, not us, are the dominant life form.

### The insects.
