Catch More Fish with Science

Marine scientists from GCRL and local professional fishing guides are teaming up with the Marine Education Center to offer a series of six evening seminars that will help you catch more fish!

**Thursdays, 6-8 p.m.**

$30 per session

Marine fisheries scientists will share no-nonsense facts about what fish eat and when they eat and explain how time of day, tide state, water temperature, salinity and moon phase affect the movements and appetites of popular fish species. Experienced fishing guides that know the area will impart tips, secrets and their own fishing tales, sure to help you hook up on your target species.

Each of our evening events includes an invitation to join us for a “mixer” after the seminar. A local guest chef prepares dishes using the fish we are targeting that evening.

20% **DISCOUNT** for members of Osher Lifelong Learning Institute and USM students and staff.
